SUMMARY

Self-taught Developer with an Energy Engineering background and early Computer Science exposure through an intensive Mathematics-Informatics high school program. Transitioned into software/web development through intensive self-study, building projects with 5+ programming languages, modern frameworks, testing practices, and SQL/NoSQL databases. Passionate about scalable, efficient, real-world solutions and continuous technical growth.

EDUCATION

M.Sc. in Energy Systems Management

University Politehnica of Bucharest

Present – Expected 2028

B.Sc. in Energy Engineering

University Politehnica of Bucharest

2020 – 2024

- **Relevant Coursework:** Artificial Intelligence Techniques, Data Structures & Algorithms, Programming Languages (C, Python), Applied Informatics (MATLAB), Computer-Aided Design (AutoCAD), Electronics

Courses: Web Development Bootcamp, React & Python Courses (Udemy), CS50 (Harvard University)

PROJECTS

Book Notes App - JavaScript | Node.js | Express.js | PostgreSQL | Docker | EJS

- Built a layered Express.js backend with PostgreSQL migrations, authentication, and external API integration
- Designed a normalized PostgreSQL schema with indexed relationships for secure data isolation and efficient queries
- Implemented secure authentication using bcrypt, JWT, HTTP-only cookies, and protected routes
- Developed CRUD book management with validation, ratings, sorting, and cover fallback logic
- Added unit tests for controllers and authentication middleware behavior

Quiz App - JavaScript | React | CSS

- Developed a timed quiz app with React and Vite, featuring dynamic flows and interactive input handling
- Managed quiz state with React hooks for answer tracking, progression, and result rendering
- Implemented timer-based logic with auto-skip functionality and performance tracking
- Built reusable components and a responsive UI with custom CSS

Restaurant Menu App - Python | Django | SQLite | Bootstrap

- Built a responsive app featuring category-based item organization and browsing
- Designed the backend data model for menu items, including pricing, availability, and descriptions
- Developed menu listing and item detail pages using Django class-based views and Bootstrap
- Added Django Admin tools and QR code access for fast updates and contactless mobile use

PROFESSIONAL EXPERIENCE

Self-Taught Developer

2024 – Present

- Built 20+ projects in full-stack development, databases, and scalable systems
- Completed 5+ courses and bootcamps on programming and modern development
- Applied backend, authentication, API, testing, and scalable design principles in practice

Software Engineer Intern

06/2023 – 08/2023

National SocietyNuclearelectrica SA, the CNE Cernavoda branch

- Developed SQL databases and optimized queries using SQL Server and Access
- Programmed Yokogawa and Fischer-Porter industrial controllers
- Built real-time flow-control simulations using PID regulation
- Developed Visual Basic GUI applications for process simulation
- Applied Fortran in industrial automation and controller programming
- Performed hardware calibration, testing, and troubleshooting
- Worked with industrial networking and real-time simulation systems
- Collaborated with engineering teams on simulator maintenance and support

TECHNICAL SKILLS

- **Programming Languages:** JavaScript, Python, Java, C, SQL, Fortran
- **Frontend:** React, HTML, CSS, Bootstrap
- **Backend:** Node.js, Express.js, Django, Flask
- **Databases:** PostgreSQL, MongoDB, SQL Server
- **Other Technologies:** Codex (AI Agent), VS Code, Git, GitHub, Docker, CI/CD, Linux
